ZUKWEND v2.1.6 ENTERPRISE — USER MANUAL & OPERATIONAL GUIDE

Local-First Accounts Receivable & Credit Management AI Agent — Consolidated Client Dossier Edition

---

1. QUICK START (TIER 1 NATIVE ENGINE)

ZUKWEND is designed to work immediately out-of-the-box with zero setup:

1. Extract the "Zukwend_Full" ZIP archive to any local directory (e.g., C:\Zukwend\).

2. Double-click "ZUKWEND.exe" to launch the application.

3. Click "Select Invoice File / Folder" in the main interface to choose your target PDF invoices (ready-to-test sample invoices are provided in the "demo\" folder).

4. Click "Run Document Analysis". In ~1 second, ZUKWEND extracts invoice data, calculates aging risk, generates branded PDF reports, and prepares 1-click email reminders.

No internet connection, external servers, or API keys are required for Tier 1 operation.

---

2. FIRST-TIME LAUNCH NOTICE (WINDOWS SMARTSCREEN)

Because ZUKWEND runs as an autonomous, local-first executable without requiring administrative installation rights, Windows Defender SmartScreen may display a standard protection message on first launch.

To proceed:

1. Click on "More info".

2. Click on the "Run anyway" button.

Publisher: OLTREVISTA

Note: ZUKWEND is verified and packaged by OLTREVISTA with strict security and file integrity guarantees.

---

3. AI EXECUTION ENGINES: THE 3-TIER ARCHITECTURE

ZUKWEND provides three flexible execution tiers to match your corporate privacy and performance requirements:

[TIER 1] ZUKWEND CORE AI (Default — 100% Offline & Instant)

- How it works: Built-in deterministic rules and local AI parser.

- Setup required: NONE.

- Privacy: 100% Air-Gapped and Local. Zero data transmitted anywhere.

- Speed: ~1 second per invoice.

[TIER 2] LOCAL OLLAMA POWER-UP (Optional — Local Open-Weights LLMs)

- How it works: Connects to your local Ollama server for advanced open-weights reasoning (e.g., Qwen2.5, Gemma3, DeepSeek-R1).

- Setup steps:

1. Download and install Ollama from https://ollama.com

2. Open your Command Prompt / Terminal and pull your preferred model:

`Example: "ollama pull qwen2.5:7b-instruct" or "ollama pull gemma3"`

3. Launch ZUKWEND, open "Settings" in the top bar, enable "Local Ollama Engine", select your model from localhost:11434, and click "Save".

- Privacy: 100% Local. Processing stays entirely on your hardware.

[TIER 3] CLOUD BYOC (Optional — Bring Your Own API Key)

- How it works: Allows enterprise teams to utilize top-tier cloud LLMs (OpenAI GPT-4o, Anthropic Claude 3.5, Google Gemini 1.5/2.0, Mistral).

- Setup steps:

1. Open "Settings" in the ZUKWEND top menu bar.

2. Select "Cloud BYOC Provider" and choose your provider.

3. Paste your personal API Key into the designated field and click "Save".

- Privacy: API calls are sent securely directly from your machine to your chosen provider via encrypted TLS. No middleman servers used.

---

4. CONSOLIDATED CLIENT DOSSIERS & FOLDER HIERARCHY (v2.1.6)

ZUKWEND v2.1.6 introduces enterprise Client Dossier Automation:

Strict P.IVA / Tax ID Matching & Anti-Data Leak:

- Multiple invoices for the same debtor are consolidated into a unified client dossier ONLY when the VAT Registration Number / Tax ID matches 100%.

- If a VAT ID is missing, incomplete, or doubtful (< 5 characters), ZUKWEND automatically falls back to an isolated single dossier, preventing any cross-client data leak.

- Windows-illegal folder characters (/ \ : * ? " < > | &) are automatically sanitized and folder names are limited to 40 characters maximum.

Permanent Folder Structure (dossier_mode = True):

output/

■■■ CLIENTS/

■ ■■■ {CLIENT_SLUG_VAT}/

■ ■■■ {YYYY-MM-DD}/

■ ■■■ STATEMENT_OF_ACCOUNT_CONSOLIDATED.pdf (Consolidated statement table)

■ ■■■ REMINDER_EMAIL_CONSOLIDATED.txt (Unified email: SUBJECT + BODY)

■ ■■■ Individual_Invoices_Archive/ (Clean archival subfolder)

■ ■■■ report_AR_INV-001_{TS}.pdf

■ ■■■ report_AR_INV-001_{TS}.xlsx

■ ■■■ report_AR_INV-001_{TS}.json

■■■ MASTER_SUMMARY_AGING_{YYYYMMDD}.xlsx (Global batch Excel)

■■■ master_erp_ingestion_{YYYYMMDD}.json (Global batch JSON payload)

Multi-Currency Partitioning:

- Outstanding invoices are listed line-by-line.

- Subtotals are strictly partitioned per currency (e.g. Total EUR: € 18,450.00 | Total USD: $ 4,200.00).

- Currencies are NEVER algebraically summed together, preserving accounting accuracy.

---

5. COMPANY BRANDING & SETTINGS CONFIGURATION

Customize ZUKWEND to match your corporate identity for generated reports and collection notices:

1. Click the "■■ Settings & Branding" button in the top navigation bar.

2. Enter your company details: Legal Business Name, Address, IBAN, and Admin Email.

3. Upload your corporate logo (PNG or JPG format) to automatically brand generated PDF reports.

4. Configure Dossier Mode settings:

- "Attiva Modalità Dossier Cliente Consolidato (Strict P.IVA)": Enabled by default.

- "Archivia singoli titoli in Individual_Invoices_Archive/": Enabled by default.

5. Configure Watch Directory & Daemon.

6. Click "■ Salva Configurazione" to persist your settings in zukwend_config.json.

6. ACTION PANEL & QUICK BUTTONS

Upon completing document processing, the bottom action panel provides 3 quick buttons:

- [■ Apri Estratto Conto]: Instantly opens the consolidated STATEMENT_OF_ACCOUNT_CONSOLIDATED.pdf in your default PDF viewer.

- [■ Apri Master Excel]: Opens the global MASTER_SUMMARY_AGING_YYYYMMDD.xlsx workbook.

- [■ Apri Cartella Output]: Opens the Windows Explorer directory containing your output files.

7. AUTOMATED WATCH DIRECTORY DAEMON

For automated background processing:

1. Open "Settings & Branding" in ZUKWEND.

2. Specify an inbound directory (e.g., C:\Invoices_Inbound\).

3. Toggle "Attiva Monitoraggio Automatico Background (Watch Daemon)".

4. Click Save. ZUKWEND will continuously monitor the folder, automatically processing incoming invoice PDFs in real time and filing them into client dossiers.

8. DELIVERABLES & ERP INTEGRATION

ZUKWEND exports standardized deliverables designed for enterprise finance operations:

1. Consolidated Account Statement (PDF): High-resolution document with company header, client dossier metadata, aging table, and partitioned currency subtotals.

2. Consolidated Reminder Notice (TXT): 1-click email text with clean SUBJECT: and BODY: sections.

3. Global Master Excel Workbook (.xlsx):

- Sheet 1 ("AR Aging Analysis"): Visual aging summary with partitioned currency subtotals.

- Sheet 2 ("ERP_Ingestion"): Strict ISO YYYY-MM-DD formatted columns ready for automated ingestion in SAP, Zucchetti, and TeamSystem.

4. Master ERP JSON Payload (.json): Unified batch payload with complete aging buckets, risk scores, and raw financial data.

9. PRIVACY, AIR-GAP SECURITY & LEGAL DISCLAIMER

- Privacy Guarantee: ZUKWEND operates under a strict Local-First & Air-Gapped architecture. Financial data, client names, and invoice records never leave your computer unless you explicitly configure a Tier 3 Cloud provider.

- Legal Disclaimer: ZUKWEND provides automated operational risk analysis and recommended collection notices. It does not constitute formal legal counsel. Always review Level 3 formal notices with your legal department before formal legal dispatch.
